SHITAL VAIBHAV SHEJOL

Software Engineer | Full Stack Developer (.NET & Angular)

+91 7276113212 | shitalshejol.work@gmail.com | linkedin.com/in/shital-shejol | Pune, Maharashtra

PROFESSIONAL SUMMARY

IT professional with 2+ years of hands-on experience in full stack web development, specializing in ASP.NET Core Web API, ASP.NET MVC, and Angular. Experienced in building and owning projects end to end — from database design to backend APIs and responsive front-end interfaces — primarily for healthcare and enterprise domains. Skilled in designing normalized, relational PostgreSQL databases, implementing secure authentication and role-based access control, and delivering performant, maintainable solutions. Comfortable interacting directly with clients to understand requirements and translate business needs into working features. Familiar with AI-assisted development tools and exploring practical applications of large language models in day-to-day engineering.

TECHNICAL SKILLS

Backend: C#, ASP.NET Web API, ASP.NET MVC, RESTful API design, Microservices architecture

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Responsive UI, Reusable Components

Databases: PostgreSQL, MySQL, Relational schema design, Query optimization, Data integrity, SSMS

DevOps & CI/CD: Docker (Dockerfile, Images, Containers, Compose, Volumes, Networks), GitHub Actions

Tools & Libraries: Postman, Swagger, Twilio (SMS/Email), OpenSSL (TLS one-way & two-way)

Version Control: Git, GitHub (branching, pull requests, merging, conflict resolution), Sourcetree

AI Tools (familiar / exploring): AI-assisted development with Cursor and Claude Console, Google Stitch for UI generation, and basic local LLM experimentation with Ollama

PROFESSIONAL EXPERIENCE

Software Developer — Aug 2025 – Present

Aiishwaa Information Service Pvt Ltd | Pune, Maharashtra

- Developing and maintaining web-based healthcare and educational applications using ASP.NET Core Web API, ASP.NET MVC, and Angular.
- Own project modules end to end — database design, backend APIs, and Angular front-end — delivering production-ready features.
- Interact directly with clients to gather and understand requirements, translate business needs into technical solutions, and maintain features against evolving client requirements.

Project: DeepMaarg — Senior-Care Discovery Platform

A two-sided platform connecting families with verified senior-care homes, featuring geolocation-aware search, SEO-indexed listings, and enquiry capture, architected as a backend-for-frontend over PostgreSQL.

- Built the platform end to end with a geolocation-aware search, SEO-indexed listings, and a cached JWT-bearer partner API client over PostgreSQL (EF Core).
- Shipped self-serve operator onboarding with BCrypt credentials, OTP email verification, image processing, Excel bulk import, and an admin approval flow secured by HMAC-signed, constant-time-validated email links.
- Hardened for production with role-gated admin access, HSTS, and strict cookie policy, and implemented GDPR Consent Mode v2.
- Drove SEO and performance work — JSON-LD, canonical URLs, sitemap.

Tech: *ASP.NET Core 10, EF Core, PostgreSQL, JWT, C#*

Project: Nirvaan Pharmacy — Multi-Branch Pharmacy ERP

A multi-branch pharmacy ERP for healthcare organizations covering the full procurement-to-dispensing cycle: purchase orders, goods receipt, batch and expiry tracking, prescription-based sales, returns, and GST-compliant invoicing.

- Developed RESTful APIs in ASP.NET Core 8 / C# with Entity Framework Core 9 and PostgreSQL — procurement, prescription-based sales, batch/expiry tracking with FEFO allocation, stock ledger, and GST/HSN tax masters — secured with JWT authentication and role-based access control.

- Built the Angular 20 SPA (standalone components, zoneless change detection, RxJS, PrimeNG, Bootstrap 5) with Reactive Forms, custom async validators, HTTP interceptors for JWT injection and session handling, route guards, and a SignalR client for real-time notifications.

Tech: *Angular 20, TypeScript, RxJS, PrimeNG, ASP.NET Core 8, EF Core 9, PostgreSQL, SignalR, JWT*

Project: Nirvaan — Rehabilitation & Elderly Care Platform

A comprehensive healthcare management platform for rehabilitation centers and old-age homes, streamlining patient records, pharmacy operations, therapy scheduling, and administrative workflows for both providers and patients.

- Designed and developed RESTful APIs using .NET Web API for patient, pharmacy, and therapy modules.
- Built dynamic Angular front-end interfaces for pharmacy stock, prescriptions, and therapy session management.
- Implemented secure authentication and role-based access control for administrators, pharmacists, and caregivers.
- Designed and optimized PostgreSQL schema and queries to ensure high performance and data integrity across related entities.
- Automated workflows such as medicine purchase/sale tracking and therapy scheduling in collaboration with the team.

Tech: *Angular, TypeScript, C#, .NET Web API, PostgreSQL, Microservices*

Software Engineer — Jul 2024 – Jul 2025

DNSTECH Solution Pvt Ltd | Chhatrapati Sambhajinagar (Aurangabad), Maharashtra

- Built healthcare and trading solutions as a full stack developer using .NET Web API and Angular.
- Delivered end-to-end features across frontend, backend, and database layers on HMS, Tread Client, and CVMS projects.

Project: HMS — Hospital Management System

A comprehensive Hospital Management System handling end-to-end operations across frontend, backend, and database layers, streamlining hospital workflows and improving patient care and administrative efficiency.

- Developed modules for hospital & branch management, patient management, and doctor & user management.
- Built treatment & medication, financial management, and finance & accounting modules.
- Implemented room & ward management and the patient discharge process.
- Designed and implemented both front-end and back-end components as a full stack developer.

Tech: *Angular, TypeScript, C#, .NET Web API, SQL*

Project: Tread Client — Trading Application

A comprehensive web-based trading application with real-time trade execution, market analysis, and pattern recognition capabilities.

- Built reusable UI components and live market-data views for real-time market analysis.
- Implemented trade actions along with authentication and authorization.
- Designed the front-end and implemented back-end APIs as a full stack developer.

Tech: *Angular, TypeScript, C#, .NET Web API, SQL*
